

## Stainless Steel Multi Grip Rivet Dome Head

Multi-Grip rivets are a simple and cost effective method for securing two or more components together from one side. Ideal for applications where the join varies in material thickness and would require several rivet sizes. The extensive grip range capability allows design flexibility and reduced rivet inventory. Typically used in sheet type products, the Multi-Grip Rivet is a general purpose fastener ideal for use across various applications.

**Material:** Body Stainless Steel 304 **Finish: Body** Stainless Steel 304  
Mandrel Stainless Steel 304 **Mandrel** Stainless Steel 304

Part Number	Hole Size	Grip Range	H	T	D	M	Hole Size	Strength KN	
								Shear	Tensile
AVFI-0408	3.2	1.0-3.0	6.6	1.4	3.2	8.9	3.2	1.2	1.3

Dimensions and specifications are subject to change without notice. Check your distributor for the latest data sheet. The test data provides approximate strength values averaged in multiple tests in various materials and thicknesses. We recommend testing your application when an exact strength figure is required, or the load to be applied comes close to the published data.
