

Aluminium Dome Head Grooved Rivets

Grooved rivets are a specialised fastener designed for securing fibrous materials like wood and low to medium density plastics. They feature a cylindrical body with annular rings and are typically made of metal for strength. In essence, grooved rivets provide a strong, reliable method for joining fibrous materials, ensuring durable and secure connections with minimal risk of damage.

Material: Body 5052 Aluminium **Finish:** Natural
Mandrel Zinc Plated

Part Number	Hole Size	B	A	C	D	E	Strength KN	
							Shear	Tensile
TASDG-0514	4.3	14	4.0	8	4.0	2.2	0.88	1.4
TASDG-0610	5.2	10	5.0	10	4.8	2.6	1.18	1.6
TASDG-0614		14						
TASDG-0618		18						
TASDG-0624		24						

Dimensions and specifications are subject to change without notice. Check your distributor for the latest data sheet. The test data provides approximate strength values averaged in multiple tests in various materials and thicknesses. We recommend testing your application when an exact strength figure is required, or the load to be applied comes close to the published data.
